

CREDI NISSAN

August 18th, 2008.

To whom it may concern,

Currently our company is using Portman products for different markets such as finance and fleet management. The GT3000 GPS/GPRS/SMS Tracking unit has successfully passed all testing by our QC Department.

These products have enabled us to be one step ahead of our competitors, since they possess the latest state-of-the-art technology as well as being durable and reliable. We feel very confident with Portman as a company and that is why they have become our only supplier for tracking systems. Therefore, I recommend Portman without hesitation as a strategic technology partner.

Sincerely,

Fernando Hermoza
CEO Credi Nissan
